## AMMA CONSULTING

Providing Electromagnetic Safety and Security Services

Are you at risk? What are the health concerns and financial repercussions of known and unknown sources of EMR and RF? Understanding these threats can present a challenge to individual and business health. AMMA Consulting has been involved in the science and medical effects for over ten years. Along with the thirty years of data forensics and with the new emerging technologies in communications, we have seen huge strides in the way we live and work, but unfortunately the science of effects has lagged behind. AMMA has spent ten years involved in the neurological and pathological effects of the Electromagnetic Spectrum and the surveillance of these technologies.

By understanding the available research and current information, you can better protect yourself, family and business by utilizing the consulting and services provided by AMMA and their associates. Though invisible to the naked eye, the radiation, EM waves, particulate and frequencies have a profound effect on your health and livelihood. Simple and cost effective counter-measures will pay huge dividends in your long term plan for success and health.

Please review information on this site and understand the potential and current risks facing us in the twenty first century. The Electromagnetic Spectrum is a double edged sword. Scientific research has proven it yet the media and governmental agencies have ignored it. It is imperative to private business and citizens to understand these risks and take steps to mitigate the threats.

### **WARNING SIGNS**

- Telephone interference and varying noise
- Disconnected land line calls
- Clicks, hum or Speakerphone feedback
- Cellular phone dropped calls
- Lower cellular battery life
- Longer cellular start up or shut off times
- Cellular phone starts up on it's own
- Radio/Stereo interference (FM/AM)
- TV reception interference and modem satellite disconnections
- Similar reception issues experienced in your automobile
- Computer modem and router freeze (Ethernet or wireless)
- Business issues and losses
- Lost or reduced client retention
- Recent burglary whether you had losses or nothing was taken
- Furniture or fixture misplacement
- Wall debris or construction changes or damage
- Recent service calls addressing electronics or appliance failures
- Strange electronic sounds noticed at or during sleep
- Recent gifts of electronics, furniture or knickknacks
- A feeling you are being followed or watched
- Recent contact by old friends or associates
- Strange questions or requests
- Recent temporary loss of cell phone or misplacement at work
- Signs of computer tampering or movement at home or office
- Visible sightings of vans and service vehicles in your vicinity

### **WARNING SIGNS (PHYSICAL)**

- Confusion
- Attention deficits
- Foggy feeling
- Tinnitus (sporadic ringing in ears)
- Dizziness

- Sleeplessness
- Headaches
- Recent weakness or tiredness after nights sleep
- Paresthesia in hands and feet (numbness, tingling, sleeplike sensation)
- Falling forward feeling or general imbalance
- Sensing sounds that others do not hear
- Increased irritability either at home or at work
- Increased depression or melancholy

## **TSCM - Technical Services Counter Measures**

AMMA provides a full and complete analysis of premises for all sources of EMR and RF frequency. Sources emanating externally and internally. There is a greater risk of covert and undetected transmissions as advances in surveillance and communications has presented a substantial amount of dangerous RFI and EMI emissions that have a serious impact on your health and livelihood. Simply stated, the technology is abundant and cheap. Anyone can transmit a wide range of frequencies from a few hertz to over 300 Gigahertz.

Whether video, data, audio or optical, these transmissions have a frequency and the ability to penetrate your person and privacy. Cell phones, WiMax, WiFi, Bluetooth, Zigbee, UHF, VHF and all the way down to RFID low frequency, these transmission have not only surveillance aspects but a serious concern for health and safety.

AMMA provides a complete analysis of both known and unknown sources either originating from outside into your space and transmissions emanating from inside your environment to an outside receiver.

Consultation with AMMA Associates will help you to understand the potential risk and repercussions to possible covert frequencies.

- **SPECTRUM RF ANALYSIS (10 KHz - 40 GHz)**
- **L, S,C,X and K MICROWAVE BANDS**
- **RADIO SIGNAL ANALYSIS (10 KHz - 6 GHz)**
- **RF AUDIO ANALYSIS (10 Khz - 3.3 GHz)**
- **VIDEO ANALYSIS (to 6 GHz)**
- **MICROPHONE SWEEP**
- **RF SWEEP (to 12 Ghz)**
- **INFRARED SWEEP**
- **AC POWER LINE ANALYSIS**
- **COAX / CATV LINE ANALYSIS**
- **SECURITY SYSTEM ANALYSIS**
- **POTS/PHONE LINE ANALYSIS**
- **CELLULAR ANALYSIS (incoming-outgoing)**
- **WiFi / WiMax SECURITY ANALYSIS**
- **MICROWAVE ANALYSIS (spurious emissions)**
- **EM / EMI ANALYSIS (magnetic field emissions)**
- **GAMMA ANALYSIS**
- **PREMISES SWEEP (including all electronics and furnishings)**

- **VEHICLE INSPECTION**
- **PHYSICAL INSPECTION**
- **BOROSCOPE INSPECTION**

This full compliment inspection will provide you with all known and unknown sources of RF frequencies and devices as well as the magnetic and electrical field issues that may exceed the safety recommendations for exposure.

AMMA Associates can provide you with a detail explanation and information regarding the equipment used in this analysis and sweep. If you suspect spurious transmissions that are from unknown sources either incoming or outgoing, it may be of a surveillance variety or a dangerous source from some other illegal or unintentional radiators. Illegal eavesdropping or transmitting is commonplace and their purpose is most often of a covert and illegal nature.

Contact AMMA Associates from the contact page. If you call for information on countermeasures, please do not use your home, business or cell phone and do not call from those locations. Please review the Safety page for information regarding signs you may have unknown and dangerous emissions and transmissions.

## **CONSULTATION**

AMMA Associates provides free consultation to clients in regards to their suspicions and concerns regarding the effects of exposure to spurious RF or covert, unknown potential surveillance frequencies and phenomenon.

We consult in several ways. Along with providing a consultation on the prospect of surveillance or EMR and the on-site services and costs, we provide consultation and assistance in doing your own EMR and RF analysis that includes the simple low cost options and tools, up to sophisticated equipment based upon experience and hands on evaluation knowledge of equipment available.

If you think you can buy a two hundred dollar gimmick off Amazon or ebay and effectively find the sources of your problems you will end up greatly disappointed. There are more useless and false advertising with these devices than you can shake a stick at. They are geared to select cellular and WiFi frequencies and gap major bandwidths and RF ranges used by eavesdroppers and commercial transmitters.

AMMA Associates covers the spectrum and knows the shortcuts in getting to the heart of the matters that are effecting your health, security and peace of mind.

Along with the on-site analysis you receive a full reports of findings as well as an advisory summary on simple and needed changes to avoid being victimized in the future.

The state of the art and rapid changes in technology are far exceeding the common sense and more importantly the legal, health and ethical issues associated with greedy corporations looking for a buck at the expense of consumer and public safety. We have a motto here that says you are on your own. You may not even know that research has determined that prolonged cellular and WiFi exposure increases the risk of brain and other associated tumor incidence and children are more at risk than adults.

Years ago it was power lines, but now the EMR is across the spectrum from GPS, Satellite and Wireless technology down to RFID and ELF . It's not just your computer's CRT you need to be aware of anymore. Surveillance frequencies in higher ranges are a threat in more ways than one.

With the current state of the economy we know that you need to protect yourself from fraud and theft and protecting yourself from medical issues just as important. AMMA Associates

understands that in order to get these advanced detection services that terms for the services may be necessary. We can discuss those issues as well.

Check with other TSCM firms and get some pricing and details regarding their services and fees and then call AMMA. If you are impressed with ex- Law Enforcement or FBI, you need to be educated regarding some recent information made available to our associates. Call AMMA before moving forward.

You can easily access much of this information on our website by requesting a password for that material or you may contact us through email or by phone. If you are concerned regarding eavesdropping or technical surveillance, please make sure you contact through a secure method. Do not use your home, office or cell phone and do not originate calls from your office, home or automobile.
